

The data that runs your business is the hardest data to reach.

Reports sit buried in systems nobody wants to touch. Mainframe files come out as noise. A single audit request turns into an all-day search.

And every workaround you've built (the homegrown script, the point tool, the manual export) is one more thing that can break.

If an auditor asks and you can't produce it, you're exposed. If the one person who knows the old system leaves, you're stuck.

There's a better way to handle it.

The Information You Need. The Moment You Need It.

OCIE is a fully managed information management platform built for regulated industries.

Mary Donnell, Owner & CEO of OCIE

One platform. Fully managed. Built for regulated industries.

OCIE turns the complex data coming out of your systems into reports your team can search, trust, and act on.

Pull any record in minutes, even years later

Retire legacy systems without losing a thing

Extract data with DataDigger. No click charges, no query language

Stay audit-ready with permanent, tamper-proof records

Replace the patchwork with one vendor and one contract

Most clients see value in weeks.

"At the end of the month I'd look at one report, tens of thousands of pages. Validations used to take me three days, maybe more. Now with OCIE and DataDigger I get done within a day. It's super fast."

Bill Norton, Systems Analyst

Why teams choose OCIE

Truly Fully Managed.

We host it, run it, secure it, and support it. Your team never touches the infrastructure.

Permanent, Tamper-Proof Retention.

Every record is locked the moment it's created. It can't be deleted, altered, or moved.

Predictable, Flat-Rate Pricing.

One monthly rate. No click charges, no storage fees, no surprise increases.

"Our old extract tool cost money every time we ran it. With DataDigger, you pull the fields and there you go. A LOT faster and much easier."

– Andy Miller, Systems Analyst

Private Cloud Infrastructure.

Your data lives in a known, controlled environment we manage. Not a shared public cloud.

37 years. 98%+ client retention. 2,500+ systems retired for the U.S. Navy.

Clients call us their favorite partner.

Some clients have stayed with us for more than 20 years. The work speaks for itself.

"OCIE's stability, hands-free maintenance, and incredible people enable me to focus on the success of our users. Thank you for the excellent support, as always."

– Bill Wesolek, Sr. Analyst & Systems Administrator, St. Mary's of Michigan

"OCIE saved us a great deal of time and heartache by having everything set up before our implementation. The training was just right, and every trainee had great things to say. Thank you doesn't quite seem enough."

– Lori Espy, National City
