Secondary NAICS: 518210, 541512

PAST PERFORMANCE

U.S. Department of the Navy

Donnell Systems, Inc. (operating as OCIE) served as the prime contractor under multiple U.S. Department of the Navy contracts, delivering specialized IT services including automated information system services and ADP software solutions. The contracts largely involved legacy system support, secure data archival, report management, and system modernization initiatives. Services were rendered under NAICS code 518111 (Internet Service Providers) with a focus on PSC codes D307 and 7030. Projects spanned across various Naval Surface Warfare Center locations and involved complex data integration, extraction, and compliance-driven report automation solutions. Additional contracts were awarded under GSA IT Schedule with Federal Acquisition Service.

- Start Date: 2000
- End Date: 2016

GSA IT Federal Supply Schedule

Donnell Systems, Inc. participated in the GSA IT Federal Supply Schedule as a prime contractor, facilitating access to enterprise-grade IT services under long-term government-wide acquisition contracts. These engagements focused on strategic IT and systems architecture, maintaining compliance with federal procurement guidelines while supporting federal agency initiatives for technology modernization and secure IT infrastructure.

- Start Date: 2002
- End Date: 2012

U.S. Coast Guard's Research and Development Center

Under contract with the U.S. Coast Guard's Research and Development Center, Donnell Systems provided automated information system services to support critical R&D functions. The engagement included data management, document workflow automation, and IT system support tasks aligned with the agency's mission-specific technology needs. Donnell Systems ensured secure and compliant handling of data and documents consistent with the operational standards required in federal R&D environments.

- Contract ID: HSCG3204FE0012
- Start Date: 2004
- End Date: 2005
- Value: \$2,294.10

CAPABILITIES

Donnell Systems, Inc. (OCIE) delivers enterprise information management built for regulated environments, aligning data governance with day-to-day operations. Teams plan and execute legacy system decommissioning while preserving the chain of custody, migrating data to secure, searchable repositories that meet retention and audit requirements. Automated extraction and document management standardize formats, enrich metadata, and eliminate manual handling to reduce errors and cycle time. AI-supported compliance checks and audit trails provide verifiable evidence for inspections and reviews. Workflow automation orchestrates approvals and task routing across departments, and managed application services keep platforms patched, monitored, and optimized for performance at scale. This integrated approach improves compliance posture, lowers maintenance costs, and accelerates access to critical records.

CORE COMPETENCIES

- Legacy System Decommissioning
- Automated Data Extraction
- Secure Document Management
- Workflow Automation
- Regulatory Compliance & Audit Readiness
- Managed Application Services

DIFFERENTIATORS

Donnell Systems, Inc. (OCIE) brings over 30 years of delivery in regulated environments, backed by production deployments in government, healthcare, and financial sectors. Solutions require no upfront investment and run against existing business logic, which reduces risk and shortens timelines by avoiding complex data migrations. Platforms are delivered as secure, audit-ready systems with rapid implementation, minimal IT lift, and verifiable compliance evidence built into operations. This combination of zero capital entry, migration-free activation, and proven sector performance enables fast, reliable modernization at scale.
